

GuestLinX for Education

Schools requiring solutions for killer coverage, connections that don't drop and fit within budget constraints can look to GuestLinX Wireless. GuestLinX have been providing the education sector with Wi-Fi since 2006, since the early adoption of 802.11g. With a dedicated educational team and pricing plans, plus the experience in working with dozens of schools across the US, they can be considered the authoritative Wi-Fi organization for a school network.

Have you come across these challenges?

- Dead spots with no coverage
- Slow speeds with low capacity
- Poor security with visibility of teachers network to students
- Connections and packages that drop
- Unable to connect to the Wi-Fi network
- Constrained budgets to update the network
- No guest access

Benefits of GuestLinX Educational Wi-Fi

- Ease of management - Take control of managing your own wireless network, or take a full management support package from GuestLinX
- Education pricing - Very strong connections with leading wireless manufacturers, including being the largest Ruckus US partner
- US based support - Unparalleled support for wireless networks, from helpdesk support to same day failed hardware replacement
- Security - Networks are implemented with the latest security standards to maximize network security
- Reliable coverage - Guaranteed 100% coverage ensuring users always have the ability to connect anywhere within the zones
- Leading hardware - Providing technology from leading manufactures provides reliable equipment

Features of GuestLinX Education Wi-Fi

- Consistent, reliable connectivity no other Wi-Fi system can touch
- Two to four times the coverage using fewer APs than competing solutions
- Low packet loss and high performance
- A safer environment with less interference, through "eco-friendly" adaptive signal technology
- System self-healing capabilities
- The lowest cost of ownership
- Support for standard 802.1x, WPA (PSK) and WPA-2 (AES) security, plus automatic wireless setting and encryption key security
- Guest access for visitors high capacity network capable of delivering all the data needed for a fast, sufficient network

The next steps to having a GuestLinX Education Wi-Fi solution

1. Call GuestLinX to receive a free consultation (800 266 3585)
2. Provide site plans/floor plans to receive a proposed system design and budgetary no-obligation quote
3. Arrange for a site survey to receive a guaranteed coverage system design
4. Book a Wi-Fi installations date supplied by our in-house certified engineers
5. Confirmation site survey to ensure 100% coverage, apply optimizations and network topology
6. Supported with a US based team capable of providing next business day onsite replacement
7. Optional on-site training for network staff

A Typical school configuration would be

- Separate Wi-Fi SSID's (Networks) for teachers, students and visitors
- VLAN's to separate traffic on the LAN side
- Integration of security into Microsoft Active Directory so that users have one account for all access
- Automatic client laptop configuration via Active Directory GPO (Group Policy Object) for ZERO configuration at the client side!
